CSE427s - 1 Lab1 100% (5/5)

<b>/</b>	1. tha	Using Hadoop we can do the following <b>processing tasks</b> for Big data (check all tapply):
	A	batch processing
	В	inter-active processing
	C	stream processing
	D	iterative processing
	E	search
	F	none of the above
<b>~</b>	2.	This information is stored on the NameNode. Provide one term.  meta-data
<b>~</b>	3. A	(H)DFS is very efficeint for data mutation and random write processes.  True False
<b>~</b>	4. dat A B C D	The recommended replication factor (this cooresponds to the total number of a block copies stored) for your data blocks is:  1 2 3 4 >4

5. How do you list all files/folders in the root directory of your HDFS? Enter the terminal command exactly as if you would run it in the command line (HINT: you would not insert the \$ sign in the command line, so don't include it in your answer).

hadoop fs -ls /
